

## Crompton Instruments DIN-rail enclosure 3-in-1 current transformers

A range of 3-in-1 current transformers combine three traditional current transformers in one low profile DIN-rail enclosure. 3-in-1 current transformers can be directly mounted onto a DIN-rail, thus saving installation time where fitting three standard individual current transformers would be required. The 3-in-1 range of current transformers offers primary currents between 50-250A with 5A secondaries with up to class 0.5 accuracy performance.
